

Dear Patients and Families from the North,

We understand this is a very challenging and disruptive time for you. I wanted to assure you that you and your family will receive ongoing care from the compassionate and highly skilled care teams at our Edmonton Zone hospitals and Women's Health programs.

The Edmonton Zone has four Adult acute care facilities that provide care to pregnant persons and their families, including Neonatal care.

We have temporarily arranged a clinic for those pregnant patients who require prenatal care. The clinic is located onsite at the Lois Hole Hospital for Women, Royal Alexandra Hospital campus. This clinic will provide care coordination and help you connect with a family physician, registered midwife, or obstetrician for ongoing needs. If you do not have an accepting physician in the Edmonton Zone currently prearranged and need ongoing prenatal care, we would ask you to call 780.735.6635 to schedule a prenatal visit.

Once you have delivered your newborn, our Healthy Beginnings Public Health team will be in touch with you within 24 hours of discharge from the hospital.

We recognize this can be a very difficult time for you and your family and want to ensure you are connected to local resources to support you for any urgent or non-urgent needs.
