

# Quitting smoking will help your cancer treatment work better

## Quitting smoking will:

- Help improve your wound healing following surgery
- Increase the effectiveness of your chemotherapy
- Increase the effectiveness of your radiation therapy
- Decrease the risk of developing a lung or wound infection
- Decrease your risk of developing another type of cancer
- Help keep your lungs and heart healthy

## To quit smoking or stay smoke free:

Talk to your cancer care team today

Call the NWT Quitline at  
**1-866-286-5099**

Visit
