NWT health information records for pregnant individuals

Health records for persons displaced by NWT evacuations can be requested via Fax: 867-777-8016 or by e-mail Healthrecords_IRH@gov.nt.ca, even if your home community is not Inuvik.

If you have a phone number, please provide this in your fax or email so that a Health Records specialist can connect with you if they need to clarify your request.

If possible, please complete the following form if you are requesting your own information:

<https://www.hss.gov.nt.ca/sites/hss/files/resources/request-access-correct-health-info-yours.pdf>.

If you are unable to complete this form and you are requesting your own information, we will be able to help you to access your health information.

Your health care provider in your current location can also make a request on your behalf. Instructions for health professionals requesting information can be found here:

<https://www.hss.gov.nt.ca/sites/hss/files/resources/request-access-correct-health-info-someone-behalf.pdf>

Due to the expected volume of requests, requests will be prioritized for information that is necessary for urgent or direct patient care. We will attempt to respond to requests that are urgent within our business day. Requests for less urgent needs (e.g. not related to immediate care, insurance claims unrelated to evacuation orders and others) will be attended to as quickly as we are able, but there may be delays.
